## Technical Data Sheet Jet Folio Tacklite Signage Film

230 µm **matte white PE/PP polymer adhesion Ink Jet Film**  
**(Water-resistant Coating)**

### Product Characteristics

Special natural polymer adhesion surface on the reverse that has been developed without the use of adhesive or chemical agents, for Vehicle Graphics, Window Signage, Display Graphics  
The raw material has been exclusively manufactured, developed and supplied for the car protection industry originally.

Special natural polymer adhesion surface on the reverse that has been developed without the use of adhesive chemical agents

"No residue" is left on the correct application surface when removed.  
Supplied with a water-resistant ink jet coated surface

Available Roll Formats – 36" 42" larger Sizes on request

### Applications & Handling

Caution: When the product is applied to PVC/Vinyl or Glossy Aluminium the adhesion becomes permanent. If used for the above applications then the product can be removed and the surface cleaned with standard acetone products On Polyester lacquers, stainless steel and soft PVC the special reverse polymer adhesion can become permanent when subject to a high concentration of heat. For raw metal surfaces under extreme heat, a strong adhesion and peeling force should be expected. We recommend that you pre-test your application surface prior to actual application  
If an over-laminate is required, then we recommend Cold Lamination. Not developed for true re-positionable applications

### Physical Properties:

Thickness: 230 µm  
Opacity: > 95%  
Media Colour: L 94,4  
a -0,07  
b -2,58

### Conditions of use/storage:

Operating Temp: 15° - 45° C  
Rel. Humidity: 40% - 65%  
Storage Time: min. 2 Years
